SGWU NEWS RELEASE

February 29, 1972
for release upon receipt

ESP...
MINDPOWER IMMIGRATION AT S.G.W.U. MARCH 2

The controlled development of ESP will be examined by the department of Religion at Sir George Williams University this Thursday.

Speaking will be Rev. Stephen Barham, Eastern Orthodox priest now with Silva Mind Control International (no, not the Mission Impossible one), an organization for training and research in psychic development.

"Research on alpha-theta brain wave control methods has led to the recent discovery that ESP and other forms of psychic activity can be acquired through training the conscious mind," says John Rossner, associate professor of religion. "We intend to give particular attention to implications for education and for the study of the phenomenology of religious experiences."

Fr. Barham will discuss the history of research to date, and the possible spread of new mind powers in societies of the near future.

Thursday, March 2 at 3:15 p.m. in room 920 of the Hall Building, de Maisonneuve at Bishop.
